Steel wire

The support is made of strong steel wire which offers numerous advantages.

Thanks to its greatly reduced surface, accumulation of dust or dirt is minimal.

Steel Wire support can be cleaned easily and quickly using regular disinfecting products.

Electrostatically applied paint made of thermoplastic powder, baked in a high-temperature oven, and white enamel finish resistant to corrosive cleansers and impact will protect the steel against corrosion for decades to come.

It can be mounted on most surfaces or on our systems of Personal Protective Equipment (PPE).
