

The PPE Dispensing Systems

The PPE Dispensing Systems are assembled in five (5) different forms: 6", 9", 12", 18" or 24" width by 36 inches in height.

We can suggest a different configuration of modules for each system.

We can also create a system to your specific needs.

All your actual accessories can be adapted on any of our systems.

No glue, no tools!

This PPE Dispensing System can be turned in any direction, thanks to a hinge permitting it to revolve, this giving easy access to the back to clean with ease, making this product indispensable.

The PPE Dispensing System is optimized by a simple and easy way to change module, thanks to a system of screws requiring no tools.

All medical personnel will have access to a specialized Dispensing System organized for and to specific requirements of your work environment.

Our PPE Dispensing Systems are extremely reliable thanks to their capacity to adapt to new environments with their sturdy and stable construction. They are also part of our **Green-Medic*** replacement plan.
