Medic Acces 

Wire mesh storage container adapted to ramp or mount on a bracket.

Model DY1 for single use isolation gown.

Storage bin especially designed for Distech yellow Isolation gown.
Can accommodate other gown types.

To keep gowns dust-free, we recommend to open up the top bag wrapping and leave gowns in opened bag.

Wire mesh container adapted to ramp.
Model DY1

Dimension of container.
W 25 X D 11 X H 16 1/4 in.

Legend
Measurements in inches
W= Width from left to right
D = Depth from front to back
H = Height from top to bottom

Rigid wire mesh container.

The storage container is constructed of strong steel wire which offers numerous advantages.

Thanks to its reduced surface area, accumulation of dust or dirt is minimal.

Steel wire container is cleaned easily and quickly using regular disinfection chemicals.

Thermoplastic powder paint electrostatically applied is baked in high-temperature oven and results in a glossy white enamel finish resistant to corrosive cleansers and impact that protects steel against corrosion for decades to come.

Warranty

All **Medic-Acces** PPE Dispensing Systems, including modules and storage system components are accompanied by a lifetime replacement warranty.

The quality of our products ensure reliability and longevity. Only misuse and deliberate destruction of the appearance of the paint finish are not subject to this warranty.
